Crtc2−PGE2_vs_control−PGE2 − GO:MF (UP)
transmembrane signaling receptor activity
tubulin binding
GTPase regulator activity
nucleoside−triphosphatase regulator activity
microtubule binding
phospholipid binding
actin binding
G protein−coupled receptor activity
cytoskeletal motor activity
polypeptide conformation or assembly isomerase activity
PDZ domain binding
microtubule motor activity
pattern recognition receptor activity
D−mannose binding
G−protein alpha−subunit binding
