Crtc2−adenosine_vs_control−adenosine − GO:BP (DOWN)
T cell activation
regulation of leukocyte activation
adaptive immune response
mononuclear cell differentiation
G protein−coupled receptor signaling pathway
negative regulation of immune system process
regulation of cell−cell adhesion
regulation of lymphocyte activation
regulation of immune effector process
positive regulation of cell adhesion
cytokine−mediated signaling pathway
leukocyte cell−cell adhesion
leukocyte proliferation
regulation of leukocyte cell−cell adhesion
lymphocyte proliferation
mononuclear cell proliferation
chemotaxis
taxis
positive regulation of immune effector process
regulation of leukocyte proliferation
