control−PGE2_vs_control−un − GO:BP (ALL)
regulation of leukocyte activation
chromosome segregation
organelle fission
nuclear division
adaptive immune response
nuclear chromosome segregation
chemotaxis
taxis
mitotic nuclear division
positive regulation of cell cycle process
meiotic cell cycle
mitotic sister chromatid segregation
alpha−beta T cell activation
meiotic cell cycle process
DNA−templated DNA replication
regulation of nuclear division
regulation of mitotic nuclear division
regulation of chromosome separation
negative regulation of nuclear division
negative regulation of mitotic nuclear division
