control−adenosine_vs_control−un − GO:BP (UP)
T cell activation
response to bacterium
regulation of leukocyte activation
cytokine−mediated signaling pathway
adaptive immune response
blood vessel morphogenesis
regulation of T cell activation
chemotaxis
taxis
adaptive immune response based on somatic recombination of immune receptors built from immunoglobulin superfamily domains
leukocyte proliferation
regulation of adaptive immune response
alpha−beta T cell activation
T cell mediated immunity
regulation of T cell mediated immunity
columnar/cuboidal epithelial cell differentiation
defense response to protozoan
response to protozoan
artery morphogenesis
positive regulation of T cell mediated cytotoxicity
