Crtc2−un_vs_control−un − GSEA GO:BP
cholesterol biosynthetic process via lathosterol
regulation of chromosome separation
chromosome separation
cholesterol metabolic process
secondary alcohol metabolic process
regulation of chromosome segregation
sterol metabolic process
regulation of sister chromatid segregation
mitotic sister chromatid segregation
mitotic nuclear division
nuclear chromosome segregation
sister chromatid segregation
chromosome segregation
microtubule cytoskeleton organization involved in mitosis
nuclear division
organelle fission
spindle organization
immune response−regulating cell surface receptor signaling pathway
regulation of immune effector process
immune effector process
