control−adenosine_vs_control−un − KEGG (UP)
Pathways in cancer
Cytokine−cytokine receptor interaction
Human cytomegalovirus infection
Human T−cell leukemia virus 1 infection
Herpes simplex virus 1 infection
TNF signaling pathway
Chemokine signaling pathway
Kaposi sarcoma−associated herpesvirus infection
Viral carcinogenesis
Epstein−Barr virus infection
C−type lectin receptor signaling pathway
Viral protein interaction with cytokine and cytokine receptor
Type I diabetes mellitus
Vascular smooth muscle contraction
NF−kappa B signaling pathway
Cell adhesion molecule (CAM) interaction
Allograft rejection
Graft−versus−host disease
Viral myocarditis
Autoimmune thyroid disease
