control−PGE2_vs_control−un − GO:BP (UP)
immune effector process
T cell activation
regulation of leukocyte activation
response to bacterium
vasculature development
negative regulation of immune system process
negative regulation of cell population proliferation
blood vessel development
mononuclear cell differentiation
cytokine−mediated signaling pathway
blood vessel morphogenesis
adaptive immune response
positive regulation of cell adhesion
regulation of cell−cell adhesion
regulation of immune effector process
leukocyte mediated immunity
leukocyte proliferation
chemotaxis
taxis
alpha−beta T cell activation
