Crtc2−TNF_vs_control−TNF − GSEA GO:BP
rRNA processing
ribosome biogenesis
rRNA metabolic process
negative regulation of canonical NF−kappaB signal transduction
monocarboxylic acid biosynthetic process
T cell mediated immunity
tumor necrosis factor−mediated signaling pathway
fatty acid metabolic process
cytokine−mediated signaling pathway
fatty acid biosynthetic process
ribonucleoprotein complex biogenesis
regulation of supramolecular fiber organization
monocarboxylic acid metabolic process
response to tumor necrosis factor
organic acid biosynthetic process
protein K48−linked ubiquitination
carboxylic acid biosynthetic process
canonical NF−kappaB signal transduction
lipid catabolic process
small molecule biosynthetic process
