Crtc2−un_vs_control−un − GSEA GO:BP
cholesterol biosynthetic process via lathosterol
regulation of chromosome separation
chromosome separation
metaphase/anaphase transition of mitotic cell cycle
metaphase/anaphase transition of cell cycle
cholesterol metabolic process
secondary alcohol metabolic process
regulation of chromosome segregation
sterol metabolic process
mitotic sister chromatid segregation
mitotic nuclear division
nuclear chromosome segregation
sister chromatid segregation
chromosome segregation
microtubule cytoskeleton organization involved in mitosis
nuclear division
organelle fission
spindle organization
immune response−regulating cell surface receptor signaling pathway
immune effector process
