control−PGE2_vs_control−un − GO:BP (UP)
T cell activation
regulation of leukocyte activation
negative regulation of cell population proliferation
response to bacterium
blood vessel development
negative regulation of immune system process
mononuclear cell differentiation
cytokine−mediated signaling pathway
adaptive immune response
blood vessel morphogenesis
positive regulation of cell adhesion
regulation of cell−cell adhesion
lymphocyte differentiation
regulation of immune effector process
leukocyte mediated immunity
leukocyte proliferation
chemotaxis
taxis
adaptive immune response based on somatic recombination of immune receptors built from immunoglobulin superfamily domains
alpha−beta T cell activation
