Crtc2−TNF_vs_control−TNF − GO:MF (DOWN)
signaling receptor activity
molecular transducer activity
guanyl nucleotide binding
guanyl ribonucleotide binding
GTP binding
transmembrane signaling receptor activity
GTPase activity
DNA−binding transcription repressor activity, RNA polymerase II−specific
signaling receptor activator activity
calmodulin binding
GDP binding
G protein activity
modified amino acid binding
14−3−3 protein binding
phosphatidylserine binding
proteoglycan binding
lipoprotein particle binding
protein−lipid complex binding
TAP complex binding
natural killer cell lectin−like receptor binding
