Crtc2−adenosine_vs_control−adenosine − GO:BP (DOWN)
cell−cell adhesion
immune effector process
regulation of cell activation
regulation of leukocyte activation
T cell activation
negative regulation of immune system process
G protein−coupled receptor signaling pathway
adaptive immune response
regulation of lymphocyte activation
cytokine−mediated signaling pathway
regulation of immune effector process
leukocyte proliferation
leukocyte cell−cell adhesion
leukocyte mediated immunity
lymphocyte proliferation
mononuclear cell proliferation
regulation of leukocyte proliferation
positive regulation of immune effector process
regulation of lymphocyte proliferation
regulation of mononuclear cell proliferation
