control−PGE2_vs_control−un − GO:BP (ALL)
immune effector process
regulation of cell activation
chromosome segregation
regulation of leukocyte activation
organelle fission
nuclear division
adaptive immune response
nuclear chromosome segregation
mitotic nuclear division
DNA replication
positive regulation of cell cycle process
meiotic cell cycle
mitotic sister chromatid segregation
DNA−templated DNA replication
meiotic cell cycle process
regulation of nuclear division
regulation of mitotic nuclear division
chromosome separation
regulation of chromosome separation
negative regulation of mitotic nuclear division
