control−PGE2_vs_control−un − GO:BP (UP)
immune effector process
regulation of cell activation
T cell activation
regulation of leukocyte activation
cell−cell adhesion
negative regulation of immune system process
response to bacterium
mononuclear cell differentiation
adaptive immune response
regulation of lymphocyte activation
cytokine−mediated signaling pathway
blood vessel morphogenesis
regulation of immune effector process
regulation of hemopoiesis
regulation of cell−cell adhesion
leukocyte mediated immunity
regulation of leukocyte differentiation
adaptive immune response based on somatic recombination of immune receptors built from immunoglobulin superfamily domains
myeloid leukocyte activation
alpha−beta T cell activation
