control−PGE2_vs_control−un − GO:MF (DOWN)
ATP−dependent activity
catalytic activity, acting on DNA
tubulin binding
microtubule binding
isomerase activity
macromolecular conformation isomerase activity
ATP−dependent activity, acting on DNA
single−stranded DNA binding
nucleic acid conformation isomerase activity
helicase activity
DNA helicase activity
polypeptide conformation or assembly isomerase activity
DNA secondary structure binding
cytoskeletal motor activity
single−stranded DNA helicase activity
microtubule motor activity
damaged DNA binding
pattern recognition receptor activity
four−way junction DNA binding
DNA replication origin binding
