control−adenosine_vs_control−un − GO:BP (UP)
T cell activation
regulation of leukocyte activation
regulation of cell activation
immune effector process
response to bacterium
mononuclear cell differentiation
adaptive immune response
cytokine−mediated signaling pathway
regulation of lymphocyte activation
regulation of T cell activation
adaptive immune response based on somatic recombination of immune receptors built from immunoglobulin superfamily domains
leukocyte proliferation
regulation of adaptive immune response
alpha−beta T cell activation
T cell mediated immunity
regulation of T cell proliferation
regulation of T cell mediated immunity
defense response to protozoan
response to protozoan
positive regulation of T cell mediated cytotoxicity
