control−adenosine_vs_control−un − KEGG (ALL)
Human T−cell leukemia virus 1 infection
Cytokine−cytokine receptor interaction
Cell cycle
Motor proteins
Human cytomegalovirus infection
MAPK signaling pathway
Cellular senescence
Viral carcinogenesis
Progesterone−mediated oocyte maturation
Chemokine signaling pathway
Viral protein interaction with cytokine and cytokine receptor
TNF signaling pathway
Oocyte meiosis
C−type lectin receptor signaling pathway
Type I diabetes mellitus
Vascular smooth muscle contraction
Cell adhesion molecule (CAM) interaction
Allograft rejection
Graft−versus−host disease
Autoimmune thyroid disease
